WORK EXPERIENCE

Registrar of Voters   November 2020 – September 2021
Election Work
Santa Clara, CA
- Managed and led team members during election day, ensuring seamless execution of tasks and protocols.
- Demonstrated in-depth knowledge of election laws, regulations, and procedures, ensuring full compliance with legal requirements and maintaining the integrity of the voting process.
- Resolved and assisted hardware and software issues of election devices ensuring smooth functionality.

PROJECT EXPERIENCE

TpumpMe
Fullstack Developer
- A responsive website to assist users in choosing a drink combination through randomization.
- Crafted a simplistic and visually appealing UI using HTML, CSS with accessibility standards.
- Integrated Javascript to connect frontend UI and backend logic for application functions.
- Organized version control with Git and deployed with Github Pages.

Personal Portfolio
Fullstack Developer
- Composed responsive design principles using media queries and flexible layouts to guarantee an optimal user experience across various devices, including desktops, tablets, and mobile phones.
- Implemented clean reusable components using React for dynamic rendering
- Employed Tailwind CSS to allow for rapid prototyping and consistent design implementation. Utilized utility classes and custom configurations to achieve a polished and visually appealing interface.

Receipt Tracker
Mobile Developer
- Utilized Android Studio and Java to create a feature-rich mobile application.
- Employed Android's extensive library of APIs for seamless integration of functionalities like camera access, database management, and user interfaces.
- Designed and managed an efficient SQLite database schema to build CRUD operations for seamless data manipulation, enabling users to add, view, edit, and delete entries.
